

Custom Production

E.031715.v1

Tapetex will engage in custom production under certain conditions:

- Tapetex stands for originality and will neither copy, nor interpret another company's design.
- Principally custom production is possible in those qualities where Tapetex always has the base fabrics or nonwovens in stock.
The fastest way is to submit the inquiry as detailed as possible with the colour out of the Pantone Fashion + Home Colour Specifyer. In this way we can answer immediately whether the inquiry is feasible and what the expected timing and pricing is.
- Generally the minimum quantity for a custom production is either 500 linear meters (550 linear yards) or 1.000 linear meters (1.100 linear yards) with both a maximum overage of 10%.
For specific qualities a higher minimum might be required. We can answer your question once quality and wishes are known.
- The development fee is 1.000,- which is credited with the definite order.
- The artwork has to be submitted. For digital printing in Photoshop and for laser cutting/engraving in CorelDraw PLT or Adobe AI.
- Items out of discontinued samplebooks can be produced, if technically still possible, with a minimum of 500 linear meters (550 linear yards) and a maximum overage of 10%. There is no development fee. The price needs to be calculated.
